Article description:	
Vittinge är idag Sveriges enda taktegelbruk. Härifrån kommer de klassiska tvåkupiga (T11) och enkupiga (E13) pannorna som fortfarande tillverkas med samma naturliga råvaror som alltid: lera och vatten. Tegel är ett av Sveriges mest genuina takmaterial, och de allra flesta svenska tegeltak kommer just från Vittinge tegelbruk i södra Uppland, Sveriges enda kvarvarande taktegelbruk. I området runt Vittinge finns den bästa tänkbara råvaran, en lera som har rätt konsistens och är rik på järn. Här har det tillverkats taktegel sedan 1872. Så om du vill ha ett svensktillverkat taktegel så är Vittinge det enda alternativet. Vittinge taktegel passar på alla traditionella hus med sluttande tak, nya såväl som gamla. Det är ett naturligt val för dig som vill bevara ditt gamla hus och för dig som vill att ditt nya hus ska kännas ursprungligt. Taktegel har månghundraåriga traditioner här i Sverige. Det är ett material som förenar det praktiska med det estetiska.	
Declarations of performance:	Declaration of performance number:
Yes	Vittinge-01-SE

Other information:

3. CHEMICAL CONTENT

Chemical content

Does the declaration apply to a product or chemical product?
product

Enter chemical content for the whole article. The concentration is calculated at component level according to the principle of “once an article always an article”.

Is there a safety data sheet for the article?

Not applicable

Is there classification of the article?

Not applicable

If yes, indicate the classification of the product under Regulation (EC) No

Enter which version of the candidate list has been used (Year, month, day)

2025-06-25

The article is covered by the RoHS Directive:

No

Enter the weight of the article:

Enter how large a proportion of the material content has been declared [%]:

100

If 100% material content is not declared, please state the reason

If the article contains nanomaterials deliberately added to obtain a particular function, enter these here:

Has the presence of nanomaterials deliberately added to notifiable chemical products been reported to the Product Register

No

Enter the proportion of volatile organic substances [g/litre], applies only to sealants, paints, varnishes and adhesives:

Article and/or sub-components

Phase	Delivery		
Component	Lera	Weight% of product	=100

Comment

Phase	Mounted		
Component	Lera	Weight% of product	=100

Comment

Other information:

4. RAW MATERIALS

Is there supporting documentation for the raw materials for third-party certified system for control of origin, raw material extraction, manufacturing or recycling processes or similar (for example BES 6001:2008, EMS certificate, USGBC Program)? If yes, enter system(s):

Raw materials

Total recycled material in the article

☐ Is recycled material included in the article?

Renewable material

Enter proportion of renewable material in the article

0

☐ Included biobased raw material is tested according to ASTM test method D6866:

Origin of raw material

For this product, there has been no withdrawal of virgin fossil material

Yes

If yes, please indicate the maximum percentage of virgin fossil material that can be included in the material (or item) in question

100

Wood raw materials

☐ Wood raw materials are included

☐ Included wood raw material is certified

How large a proportion is certified [%]?

What certification system has been used (for example FSC, CSA, SFI with CoC, PEFC)?

Reference number:

Enter logging country for the wood raw material and that following criteria have been met. Country of logging:

☐ Does not contain type of wood or origin in CITES appendix of endangered species

Which version of CITES has been used for the check?

☐ The timber has been logged legally and there is certification for this

5. ENVIRONMENTAL IMPACT

Environmental impact during life cycle of the article, production phase module A1-A3 under EN

☒ Has environmental product declaration been drawn up according to EN 15804 or ISO 14025 for the article?

These product-specific rules, known as PCR, have been applied:

Registration number / ID number for EPD:

The International EPD System PCR for Construction 2019:14, version

S-P-08975

If there is environmental product declaration or other life cycle assessment, describe how the environmental impact of the article is taken into account from a life cycle perspective:

6. DISTRIBUTION

Distribution of finished article

Does the supplier apply any system with multiple-use packaging for the article?

Yes

Does the supplier take back packaging for the article?

Yes

Is the supplier affiliated to a system for product responsibility for packaging?

Yes

If yes, which packaging and which system?

NPA

Can packaging/packaging be reused?

Yes

Can packaging/packaging be recycled?

Yes

Can packaging/packaging be energy recycled?

Yes

Does the supplier use Retursystem Byggpal?

Yes

Other information:

7. CONSTRUCTION PHASE

Construction phase

Does the article make special requirements in storage?

No

Specify

Does the article make special requirements for surrounding building products?

No

Specify

Other information:

8. USE PHASE

Use phase

Does the article make requirements for input materials for operation and maintenance?

No

Specify:

Does the article require supply of energy during operation?

Not applicable

Specify:

Estimated technical service life for the article:

>50 years

Comment:

Is there energy labelling under the Energy Labelling Directive (2010/30/EU) for the article?

Not applicable

If yes, enter labelling (G to A, A+, A++, A+++):

If yes, enter marking (G to A)

Other information:

9. DEMOLITION

Demolition

Is the article prepared for disassembly (dismantling)?

Not applicable

Can the product be separated into pure material types for recycling?

Yes

Specify:

Varan utgörs av 100% lertegel, d v s redan "separerad".

Does the article require special measures for protection of health and environment in demolition/disassembly?

No

Specify:

Other information:

10. WASTE MANAGEMENT

Delivered article

Is the supplied article covered by the Ordinance (2014:1075) on producer responsibility for electrical and electronic products when it becomes waste?

No

Is reuse possible for the whole or parts of the article when it becomes waste?

Yes

Specify:

Då tegelpannas funktionella livslängd normalt överstiger underliggande materials livslängd är nedmontering och återmontering möjlig och förekommer.

Is material recovery possible for the whole or parts of the article when it becomes waste?

Yes

Specify:

Krossat lertegel kan användas som marktäckande dekoration alternativt som fyllnadsmaterial.

Is energy recovery possible for the whole or parts of the article when it becomes waste?

Not applicable

Specify:

Does the supplier have restrictions and recommendation for re-use, material or energy recovery or landfilling?

No

Specify:

Waste code for the delivered article when it becomes waste

170102 - 02 Tegel.

When the supplied article becomes waste, is it classified as hazardous waste?

No

Mounted article

Is the mounted article classified as hazardous waste?

No

Waste code for the mounted article

170102 - 02 Tegel.

Other information

11. INDOOR ENVIRONMENT

Indoor environment

- ☒ The article is not intended for indoor use
- ☒ The article does not emit any substances
- ☒ Emissions from the article not measured

Does the article have a critical moisture state?

No

If yes, state what:

Noise

Can the article give rise to own noise?

Not applicable

Value:

Unit:

Measuring method:

Electrical field

Can the article give rise to electrical fields?

Not applicable

Value:

Unit:

Measuring method:

Magnetic fields

Can the article give rise to magnetic fields?

Not applicable

Value:

Unit:

Measuring method:

Paints and varnishes

- ☐ The article is resistant to fungi and algae in use in wet areas

Emissions

The article produces the following emissions in intended use:
